Snuuz Done Criteria
(The things that need to be done before you can push)

1. Code should build and execute without errors
2. Code should build and execute without warnings, unless specified why such warning should be allowed
3. Code should follow the Snuuz Style Guide™
4. Visual appearance should be designed for the Google Pixel 2 Emulator, with varying screen sizes (Acceptable to not implement small screen sizes)
5. Code should not be able to crash the app (Tested)
